How We Grow

WHAT LIFE EVENTS INFLUENCE OUR PERSONALITY AND WHAT REALLY FURTHERS US IN LIFE – THE LATEST FINDINGS FROM PERSONALITY PSYCHOLOGY

Date of publication: August 24, 2022

Rights sold to: Korea (Gimm-Young), Taiwan (Heliopolis)

The personality develops differently from how we thought

It is fortunate that our personality is shaped not only by our genes but by our environment as well. This means that personal growth is possible at every stage of life, even into advanced age. But what exactly spurs this development? How do decisive life events in education and career, partnership and family, and illness and health affect particular facets of our personality? And is it possible or advisable to change our personality in a conscious, goal-oriented way?

The personality psychologist Prof. Dr. Eva Asselmann vividly and humorously presents the latest studies in this field and reveals to us unexpected findings. For example, the birth of a child contributes far less to our maturity than does our first real job. Such insights are useful for all of us. Which experiences have the most impact, and how do they influence our well-being? And how will this knowledge help us to grow when facing new situations and challenges?

Freeing Yourself of Obsessions and Compulsions

QUICKLY AND LASTINGLY OVERCOMING OBSESSIVE-COMPULSIVE DISORDERS WITHOUT MEDICATION OR CONFRONTATION

Date of publication: August 31, 2022

Rights sold to: Italy (Giunti), Korea (Dongnyok Life), Mexico (MEXICANOS UNIDOS)

Millions of people affected: more widespread since the beginning of the pandemic

Millions of people worldwide suffer from obsessive-compulsive disorders, and the number is increasing. But what is the origin of an obsessive-compulsive disorder? When are washing, re-checking, tidying up, and other such repetitive compulsions more than just harmless tics? And at what point are excessively reoccurring thoughts in need of treatment?

Klaus Bernhardt explains what lies behind obsessions and compulsions, how they develop, and when those affected should seek help. Oriented on the latest scientific findings and with the help of concrete examples, he provides sufferers with tools for self-help suitable for everyday use. In addition, he illustrates many beneficial therapeutic approaches which unfortunately are used far too seldom. With his methods it is possible to quickly get obsessive-compulsive disorders under control and maybe overcome them permanently.

- The Bernhardt Method – a very high success rate and used by many doctors, therapists and clinics
- Spiegel best-selling author: more than 400,000 of his books sold

A comprehensive insight into our inner control center by Germany's No. 1 psychologist

How does the human being function? Is there a blueprint for the psyche, a basic mental framework that all humans share? Bestselling author Stefanie Stahl delivers here fascinating insights into the interplay of perception, consciousness, and behavior. In her nimble and knowledgeable manner, she explains why feelings of happiness are our life drug, just how subjective our perception of the world is, and how our self-image is molded by upbringing and experience.

Reports from the therapy practice and many suggestions for resolving emotional conflicts make this foray into our innermost being something that can be both felt and put into practice.

- What makes us tick, what regulates us: psychotherapist Stefanie Stahl sheds light on the workings of the soul
- The interplay of psyche, consciousness and behavior, explained in an absorbing and light-hearted way

Saying No Authoritatively

THREE STEPS TO SETTING CLEAR BOUNDARIES

Date of publication: September 28, 2022

Rights sold to: Italy (Feltrinelli), Korea (Next Wave)

Getting out of the accommodation trap

The new book by the successful author Barbara Berckhan gives us the permission to free ourselves from foreign control and detrimental influences and distinctly say no in a socially appropriate way. All too often, we fall into the accommodation trap and soon realize we are once again simply doing what others want us to do. As long as this is in line with our own feelings, intentions, and goals, all is well. Often, however, the desires of others do not correspond to our own. If we continue to habitually comply with the wishes of others, we will end up feeling frustrated and angry.

Berckhan shows in three simple steps how we can represent ourselves and our opinions, show poise, and do what is best and appropriate for all concerned. Thus we can remain calm and composed in stressful situations, and distance ourselves from people that sabotage our inner focus. The book offers as well many practical strategies that will help create and maintain a functional and beneficial coexistence with our work colleagues.

- With exercises and many examples from Berkchan's practice, presented in an easygoing way with illustrations, effective tips, and clear explanations and summaries
- Over 1.5 million copies of Berckhan's books sold

Being and Becoming

NEWLY RECOGNIZING THE TREASURES AND OPPORTUNITIES OF OUR LIFE STORY

Date of publication: November 02, 2022

Rights sold to: The Netherlands (AnkhHermes)

We are more than the sum of the events that happen to us

We humans are storytellers, and what we tell ourselves is what we experience as our identity. But what is it we focus on? For many centuries now, we have been attempting to assert our uniqueness by setting ourselves apart from others. But the essence of being human is in contact, in connectedness and attachment. And the desire to give expression to this awareness is becoming increasingly felt. With a new approach to life story work, along with stimulating impulses for writing, Liane Dirks offers a way to understand how the "I" can be taken out of the "We" and how to develop a new perspective on one's personal history. The book invites us to comprehend life as a type of consciousness development, in which we can also experience spiritual dimensions of our humanity. Such knowledge provides a sense of support and orientation, as well as space for personal development.

- Discovering a new view of one's own path of life
- With impulses and inspirations for reflection and personality development

Influencing personal development through the power of thought – explained neuroscientifically

Who am I? What do I actually want to do in life? These are some of the questions Marie asks her mother at the end of her school years on a hike together in Ireland. During their walk through the natural world, a fascinating conversation develops between the two about how everything is connected with and held together somehow by our thoughts. In an easy, understandable way, Notebaert explains how the brain works, where our thoughts originate, how they influence our path in life, and how we can have some control over all this. Against a dreamlike backdrop, simple, understandable images emerge that allow us to comprehend what impels us as human beings, and what so often makes us unhappy in the process – but also what it takes to bravely take control of one's life and live it to the full.

Self-Determined

HOW TO DEAL WITH EXPECTATIONS AND LEAD AN AUTHENTIC LIFE

Date of publication: November 23, 2022

In balance with ourselves and with others

Many people nowadays are living a life that they believe they are expected to live, even though they know this does them little or no good. Based on findings from science, this book comprehensibly reveals how to free ourselves from these (perceived) fetters through small steps and how to lead an authentic life while avoiding becoming egoistic. It shows us how to reflect on our current situation, to identify our own needs, values and potentials, and to distinguish them from outer and internalized expectations. It will help us to strike a balance between our own needs and those of others, and teach us how to trust in ourselves and practice self-determination. It offers a clearly structured roadmap for implementing the insights obtained in daily life, overcoming obstacles, and rediscovering a zest for life.

- With strategies suitable for everyday use, a variety of exercises, and queries for self-reflection
- Based on the latest scientific findings and everyday consulting practice

The Risk of Being Yourself

HOW TO DARE WHAT YOUR HEART HAS LONG ALREADY DECIDED

Date of publication: September 28, 2022

How to finally bring about true change in our lives and express the essence of our being

We all may wish to follow the call of our heart, confidently live our personal truth, and allow our inner light to shine. Yet this path carries many risks. We sabotage ourselves, for example by preferring to conform and accommodate in order to be liked by others and by apologizing for so much for who we are in our innermost being.

We must stop that. Bahar Yilmaz helps lead us away from entrenched patterns, self-deception, and dependencies, and towards our mysterious innermost core. Based on her own life experiences, and by way of simple exercises and self-reflections, this best-selling author shows us how we can finally free ourselves from what is hindering our self-development – so that we can allow all aspects of our own essence to blossom and flourish in the world.

Honest, eye-opening, uplifting: for all who want to find the courage to break free from self-sabotage cycles and make their lives a wonderful adventure!

- Following the path of your heart honestly, courageously, and authentically – for all who want life to become a wonderful adventure
- With moving testimonials from the author and exercises for self-reflection

HOW CAREER MYTHS ARE HINDERING YOU FROM BEING SUCCESSFUL AND HOW TO ADVANCE IN SPITE OF THEM

Date of publication: October 26, 2022

Rights sold to: Taiwan (Business Weekly)

The secrets of a successful career

You didn't get promoted – again? No matter how good you are, if you do something wrong – or nothing at all! – you will never be recognized. Yet results alone do not lead to success. Top management consultants Dorothea Assig and Dorothee Echter have discovered this from extensive experience. They have since helped countless people uncover the causes of their career stagnation. In most cases, small setbacks have congealed into veritable career myths: the boss is a jerk, the company is ruthless, and to get promoted you must have the right connections.

With many surprises Assig and Echter lead their readers out of the "work more and harder" dead end and show how career myths can become career strategies. This is how you really advance in your career!

- The best from decades of coaching experiences: how to find your own way without having to bend to others or being intimidated

A very good, topical resource for [...] anyone aiming to join the top ranks of their organisation.

Understanding and Correctly Interpreting a Microbiome Analysis

Date of publication: July 25, 2022

The results of microbiome analysis explained for the lay person

It is now a fact that the intestinal flora has an enormous influence on both our physical and our mental health – if our intestines are happy, so are we. A microbiome analysis can provide information about whether everything is functioning well in the intestines. More and more people are thus having their intestinal flora tested, something that can now be done conveniently by mail. However, the results of such analyses are often not easy to interpret. This reference book explains comprehensively and in an easy-to-understand way all the possible results and terminology used in microbiome analysis and more especially the significance for health. Many tips for a long-lasting healthy intestinal flora are included.

- Appropriate for all available intestinal flora tests
- Everything about microbiome diagnostics, microbiome-based disorders, and intestinal bacteria and its role in maintaining health

WERNER BARTENS

Being Female Is a Health Risk

WHY THE MEDICAL WORLD HAS LONG MISUNDERSTOOD WOMEN, AND DOESN'T TREAT THEM AS WELL AS MEN

Date of publication: October 26, 2022

There is no gender equality in medicine

Does illness affect women and men equally? We think that we are all equal when it comes to viruses, cancer, broken bones and inflammations – but this is a grave error, and one which the medical world has only just woken up to. Women experience illness differently from men, their sensations are different, their symptoms are different, and they need different kinds of treatment. The fact that this hasn't yet become part of everyday practice has serious consequences for female patients: they are frequently treated much later than they should be, are given less intrusive treatment, and their afflictions are diagnosed less quickly and less accurately. This book reveals the extent to which the medical world has neglected women, why this is the case in almost every single specialism, and the patterns of thought that have created this attitude – and the danger this spells for women's bodies and lives. Here, the medic Werner Bartens describes an array of real-life cases, draws on the latest scientific discoveries, and explores the first steps that are being taken by medics to improve the treatment of women.

RUEDIGER DAHLKE

Become Old with Health and Joy

MY HOLISTIC LIFE-STYLE MEDICINE

Date of publication: September 21, 2022

There is nothing left to lose, but many important things to gain

Everybody wants to live to a ripe old age, but nobody wants to get old. For a long time old age was a synonym for the loss of mental and physical vitality, accompanied by weight gain, aches and pains, and a deteriorating capacity for memory. In his very personal approach, the holistic physician Ruediger Dahlke demonstrates how we can recover vitality, slow down the aging process, and remedy supposedly chronic diseases such as high blood pressure and age-onset diabetes. Based on the essence of his laws of destiny and life principles, he presents a highly effective "Fountain of Youth" program, including exercise, breathing techniques, cell detox, and a mini-plan with 27 plus points to noticeably increase the quality of life and bring you back to a full life while you are still alive and to calmly master the tasks in life that still need to be done.

- Holistic life principles for Golden Agers
- With an audio meditation to download, spoken by the author
- The highly effective long-life program for a longer life expectancy, better health, and more quality of life

DIETRICH GRÖNEMEYER

Changing Medicine

HEALING REQUIRES TRUST, ATTENTIVENESS AND COURAGE TO FIND NEW WAYS

Date of publication: November 09, 2022

The future of healing

When you visit your GP, do they really see and hear you? Is the advice they give solid and comprehensive, and can you fully rely on the fact that the measures they recommend are tailored to your individual medical needs? Is it safe to assume that they are taking into account the whole spectrum of medical options, to help you achieve long-term health? Or do you instead feel misunderstood and fobbed off?

In his most personal book yet, the practising medic Dietrich Grönemeyer tells the reader about the moving experiences that have made him the doctor he is today – and what we need to do to ensure the health of everyone in society: we require a tailored approach to medicine that includes the whole of a patient, an approach that prioritizes prevention, education and responsible living; where individual specialists work in unison and medics act as a fully committed, trustworthy team; and where the doctor-patient relationship means a real encounter of equals. There's no doubt in Grönemeyer's mind that change is possible. His motto "Giving life to life" sums up his belief in a healthcare system that puts us and our well-being at the centre.

Healthy through viruses

Multi-resistant pathogens have become a major problem in the healthcare sector, as many antibiotics are no longer effective. Medical science is now rediscovering a healing method that can help in the fight against such bacteria: bacteriophages.

These are viruses that are harmless to humans but are able to successfully destroy particular kinds of bacteria. Though the treatment is not yet officially approved in Germany, certain types of treatment are already available. Based on the latest research, this book provides detailed information for anyone at risk from resistant pathogens, such as diabetes and heart patients, people with cystic fibrosis, and women with recurrent bladder infections. A invaluable guide for anyone afflicted and an absorbing book for those with an interest in medicine.

- Bacteriophages – the solutions to an urgent health problem of our time by fighting multi-resistant bacteria

I've rarely read a book this well structured and instructive. Well done!

Return to a healthy, pain-free life through the power of molecular medicine

Chronically fatigued, constantly catching a cold, plagued by recurring aches and pains? Many people suffer for years from a range of diffuse complaints and a feeling of malaise that won't go away. Doctors are faced with a predicament: they can't explain the symptoms and so they can't help the patients.

In his latest book, Dr. Ulrich Strunz gets to the root of these hidden ailments. He explains how obscure symptoms can be explained and how unrecognized autoimmune diseases, heart conditions, infections, and mental illnesses can be detected and combated at an early stage. Through a few simple nutritional techniques and a healthy lifestyle, we can regain our strength and find our way back to a life full of vitality and joy.

When Your Own Child Is a Stranger to You (and You to Your Child)

HOW NEW TRUST ARISES FROM REJECTION

Date of publication: October 13, 2022

Rights sold to: China (Beijing Science and Technology)

How to overcome disappointment and discover anew your love for your child

When a child comes into the world, parents have the great opportunity to start a whole new relationship. Most want to raise the happiest child in the world. They are ready to do everything to make childhood the best time in this child's life. At the same time, this desire creates extraordinary expectations on the part of the parents. Feelings of not being understood, rejection, or disappointment can give rise to large conflicts in the parent-child relationship. For many parents it is the most devastating emotional trauma when their children do not love them the way they had hoped. Many people suffer both physically and mentally. Parents – and their children.

The renowned child and adolescent psychiatrist Oliver Dierssen uses numerous practical examples to highlight ways of achieving a successful relationship: overcoming feelings of helplessness, perceiving, understanding and coping with emotional pain, and daring to trust again.

- The comprehensive popular reference book on the taboo topic in the parent-child relationship, from a renowned child and adolescence psychiatrist

Sex Education from the Very Beginning

TALKING TO CHILDREN ABOUT THEIR BODIES, THEIR FEELINGS, AND SEXUALITY

Date of publication: August 24, 2022

Explaining things early in an easy, relaxed manner

Why does my child always have his hand down his pants? What do I say when my child asks me how her little brother got into Mum's tummy? Do I need to talk about it all now? Isn't it way too early for that? Parents are often caught off guard when it comes to explaining sexuality. Especially for younger children, the topic might seem far in the future. Yet children are so at ease with their bodies that they know no feelings of shame: Why doesn't Daddy have breasts? What is a tampon for? And what is that "down there" called?

Children need honest answers to delicate questions. This book offers the best orientation by describing sexual development from infants to about the age of ten, explaining typical types of behavior, and showing how to react age-appropriately to children's curiosity. In this way, children can develop a natural relationship with their own bodies, see trustworthy caregivers in their parents, and be safeguarded from negative experiences.

- For more composure and certainty when confronted with uncomfortable questions
- Reducing the fear and risk of early sexualization or inappropriate behavior

THE CARRYING GUIDE – FOR MORE CLOSENESS AND GOOD BONDING

Date of publication: August 24, 2022

4-colour throughout, with numerous illustrations

With a foreword by Herbert Renz-Polster

For closeness, bonding, and free hands for everyday life in the family

Humans are baby carriers. Two-thirds of the world's population carries their children in a baby sling or special baby carriers. However, the great variety of products available often creates confusion among parents. In addition, a baby carrier must fit well and securely in order to feel comfortable for the child and the person wearing it, and it certainly must not cause any back pain.

Frauke Ludwig and Diana Schwarz, directors of the Hamburg Baby Carrying School are experts when it comes to baby-carrying. With the help of sketches, photos and videos (through QR codes), they quickly and clearly show how to properly bind babies for carrying. They explain how to recognize a good baby carrier, when you can start carrying your child on your back, and why you shouldn't carry babies facing forward. Basic aspects, advantages for emotional bonding, anatomical requirements, and additional benefits for parents round off this practical help book.

- A fresh and contemporary approach, easy troubleshooting and lots of life-hacks – quick help for everyday carrying
- Numerous illustrations and video links

Species-Appropriate through Everyday Family Life

... BECAUSE REAL LIFE NEEDS REAL SOLUTIONS!
 ANSWERS TO THE MOST COMMON PARENTING QUESTIONS

Date of publication: August 31, 2022

Find your very personal species-appropriate way!

Species-appropriate is a wonderful approach to raising children – if only it weren't for the day after day irritations! Morning stress, constant bickering between siblings, the mother-in-law who keeps making pointed remarks ... In so many situations, needs-oriented parents ask themselves anxiously: How can we deal with all of this? What is the best for the child and our family?

In this guidebook, Nicola Schmidt draws on the most frequently asked questions on parenting to present very specific tips that can quickly and easily be put into practice. At the same time, she considers the questions behind the questions: What is it that is actually causing us trouble? Where do our desires conflict with reality? Where can we make compromises, and where do we need to stay true to our ideals? She invites parents to uncover false beliefs and thus to find their own species-appropriate path forward. Thus we will remain composed in everyday life and alongside our children!

HOW TO LIVE WITH CHILDREN WITHOUT LOSING TRACK OF OURSELVES

Date of publication: October 19, 2022

The book for all parents who don't want to give up on themselves in everyday family life

"Every child has a right to happy parents!" This is what bestselling author and father of four Reinhard K. Sprenger maintains, as he challenges the expectations that are burdening parents today: children are to be nurtured as young as possible, fathers and mothers are to be perfect parents, be best friends to their children, work as family managers, and be successful in their careers. But those who get mired in the search for the supposedly "right" way of upbringing run the risk of neglecting not only their own well-being, but that of their children as well. In his book, Sprenger focuses on the parents, appealing to them as mothers or fathers to take their own needs seriously. After all, we can take good care of our children only if we take care of ourselves. His book poses the most vital questions that life with children entails and helps us find answers that will make family life easier for ourselves and our children.

WHAT THE PRESSURE TO PERFORM DOES TO OUR KIDS

Date of publication: August 31, 2022

Do we expect too much from our children?

A child who works hard, gets good grades and is popular supposedly has a bright future in store. Our high-performance society values high-achievers, top degrees and fathers and mothers who do everything to encourage their children and help them succeed.

This puts great stress on parents, and especially on children. Often, the results are deeply sad, as over-achieving kids constantly deliver more than we should by rights expect. They are compliant, inconspicuous and successful – but their successes are not down to their IQ or their innate talent, but primarily the result of sheer hard work, parental support and pressure. This pressure isn't necessarily explicitly exerted by parents – kids sense our expectations, and even young schoolchildren are putting themselves under a lot of pressure.

Our culture values over-achievers, and we underestimate the gravity of the situation. It's the reason that our kids don't enjoy learning, and why we are seeing an increase in emotional problems in children. In this book, Margrit Stamm aims to increase our awareness of the crisis, taking an in-depth look at the little examined problem of childhood over-achievement, and showing parents as well as education experts how to do things differently.

Because Children Need Both Parents

MAKING USE OF NEW PERSPECTIVES – FINDING FAIR CUSTODY MODELS –
HELP FOR FAMILIES OF DIVORCE

Date of publication: July 25, 2022

Successful nurturing after the divorce

Parents are free to choose to separate – but children have to live with that decision. This makes it all the more essential to provide support that enables them to continue to have dependable relationships with each parent. This is a sizable challenge for mothers and fathers, who are often at odds with each other, lack adequate counseling, and have to deal with practical issues such as financial child support and custody.

The sociologist Nina Weimann-Sandig provides advice from a dual perspective. She herself is a patchwork mother and is familiar with the concerns about the children, the usual role conflicts, and upsetting accusations in the course of a separation. At the same time, she conducts research on the aspects of divorce and is able to demonstrate, based on current studies, the extent to which children benefit when separated parents care for them in common. She describes the residence, alternating, and nesting models, clearly identifies the various risks and opportunities, and allows parents and children to have their share of the discussion. She encourages couples to adopt “shared parenting”, especially if they engaged in parenting on an equal basis when together. Thus the most important thing for children of separation is maintained: a safe haven with both mom and dad.

- Special focus on fathers and equal parenting

Mindfulness Instead of Anxiety and Panic

CALM, PEACEFULNESS, AND (SELF-) SECURITY

Date of publication: September 14, 2022

Rights sold to: China (Beijing Science and Technology), Poland (Studio Astropsychologii)

How we can deal with anxieties and panic attacks and bring about growth and healing

People who suffer from panic attacks and anxiety disorders feel at the mercy of others, powerless and shamed. Peter Beer, bestselling author and mindfulness teacher, is all too familiar with these traumatic states of mind. For years, he suffered from rapid heartbeat, shortness of breath, and insomnia – until he discovered that simply ignoring anxiety doesn't make it go away. On the contrary, accepting it lovingly is the first step toward healing. Drawing from his successful solutions, Peter has developed a highly effective anti-anxiety mindfulness program, in which he reveals how specific meditations and breathing techniques can guide us safely through anxiety and how we can truly relax deeply and find inner peace. We can then calmly enter the present moment and transform our anxieties into a valuable resource for self-confidence, growth, and healing.

- Practicable mindfulness tools, easily integrated into everyday life, plus an exclusive audio meditation download

52 IMPULSES AND INSPIRATIONS FROM MYSTIC TRADITIONS FOR MORE
PEACE AND COMPOSURE

Date of publication: October 05, 2022

Finding your own path with the spiritual guide through the year

In the 21st century, we are fortunate to be able to draw from the rich spiritual resources of the world's religions to find the most suitable path that is sustainable for us personally. But how do you discover your own path? Which figures of spiritual thought – from Buddhism, Hinduism, nature religions, Islam, Judaism or Christianity – are relevant to your own individual life? Which ones can you make meaningful for your own personal life?

Through 52 inspirations and their corresponding exercises for everyday life, the theologian and mysticism expert Marion Küstenmacher helps us navigate through the mystical and spiritual traditions of the centuries. She gently leads us through mystical experiences which will dissolve rigid borders of experience and dualistic habits of thought, and thus make spiritual awakening possible. This process will open up a perception for the hidden reality behind material things and make us more sensitive for the miracles in everyday life.

An interspiritual and interdenominational offering for all who want to discover their own path in life.

- Informative background knowledge of the mystical traditions

Far from the World, and Yet Right in the Middle of It – My Life as a Hermit

GUIDING IMPULSES FOR ALL LIFE SITUATIONS

Date of publication: October 26, 2022

8-page illustration section

From punk to hermit – the deeply moving story of a searcher

A hermitage in the middle of the Black Forest, far from the commotion of our time: Brother Otto is a contemporary hermit who has made a commitment to quiet and seclusion. In this book he tells his eventful life, first as a punk and then a Zen monk in a Japanese monastery, and how he finally found what he had always been looking for as a hermit: harmony, serenity, and inner contemplation. Brother Otto is anything but detached from the world, however: as a monk and committed philanthropist, his door is open to all. Pilgrims and people seeking advice often knock at his door. Brother Otto is always ready to listen, and has a surprising anecdote ready for every situation in life. He puts a smile on everyone's face – no matter how difficult any situation seems to be.

An inspiring book that provides guidance and orientation and instills confidence in life. With many exercises and small meditations for discovering latent sources of strength.

- Spiritual advice and orientation: Brother Otto has an open, empathetic ear for all
- Simple exercises, meditations, and inspiring wisdom to help readers put his insights into practice – cross-denominational and in touch with everyday life

Brother Otto Stahl lives as a hermit in the Black Forest where he tends to the pilgrimage site of the Saint James Chapel. The trained letterpress printer and typesetter was part of the punk scene in the 1970s and 80s, after which he lived as a Zen monk in a Japanese monastery before finding his way through the Franciscan order to the Congregation of Hermits in Frauenbründl. He is now vice-president of the monastery, earns his living as a caregiver for the elderly and volunteers as an end-of-life carer and addiction counsellor.

A unique life, yet in some ways also a typically Black Forest life.

Happiness is creating something with your own hands

There is nothing more wonderful than the smell of bread you've freshly baked yourself. Making something with your own two hands is pure bliss, and patiently, carefully carving a piece of wood is a deeply human experience. In this wonderful and inspiring book, Christoph Merker – woodcarver, sculptor and all-round Renaissance Man – reveals how working with your hands can make you happy. He explains how to use various tools, how our hands work, how to turn your workshop into a place of refuge, how to cope with failure as well as success, that time is everything, and the art of precision and patience. This richly illustrated book includes step-by-step guides, ideas to inspire you, and practical tips and tricks for making all sorts of things with your own hands, from the simple to the elaborate, from baking bread to carpentry and gilding.

Highly recommended. Perhaps it'll inspire others to swap their mobile phone for a spell of DIY.
