WHY THE COMPROMISE IS UNCOMPROMISING

Date of publication: October 18, 2023

All rights available except Hebrew

Why compromise is crucial

Compromise is a constant companion everywhere in society, from lovers all the way to the democracy system. It is an age-old social technique that has repeatedly proved its worth, and shown itself to be vital when it comes to navigating life's storms, big or small. Sven Kuntze, charming and (street)wise as ever, explores the manifold forms that compromise can take – both in history and in modern times, in society and in the life of the individual – and shows us how it's done. A multifaceted and very personal book on the art of compromise, and a guide through everyday life.

RETIREMENT IS JUST THE START OF A NEW LIFE

Date of publication: September 20, 2023

The art of active retirement – an inspiring companion for anyone about to embark on this new stage in life

Longstanding Spiegel journalist Musall is a baby boomer. Many of her contemporaries are retiring or semi-retiring in their mid-fifties, often only half-willingly. In her new book, she reveals how she and her peers are managing the transition from a steady income and respectable working life to life as pensioners. We learn about their hopes and fears, and hear from people who see it as a new beginning and are looking for something – something to do, an income, personal development, themselves, contentment... and the happiness that a meaningful life brings with it.

If you're unsure how you'll handle retirement, you should read this – despite, or rather, because of, the fact that it's so personal.

ANTONIA SPEERFORCK

Where is My Place in Life?

FINDING YOUR OWN WAY WITHOUT LOOKING FOR IT

Date of publication: September 27, 2023

Rights sold to: Taiwan (Delight Press)

Follow your inner voice, it is said – but which one?

Is the chaotic being inside of me right, or rather is it the safety-and-security fanatic? Should I follow my inner free spirit, or listen to my fears and anxieties – or simply follow my parents' advice? There is a lot of pressure to keep pace with it all, and to discover one's true self, or at least find a job or a vocation. And doubts and uncertainty contribute their share to this tension as well.

The psychotherapist Antonia Speerforck is very familiar with these issues – not only from her own practice, but also from her own life. Her book is about seeking and finding, big dreams and small steps, allowing things to happen, and about letting go. With the help of the systemic therapy concept of inner components, she shows how we can still find a clarity among all the voices coming from both inside and out, make meaningful decisions, and follow our own path. This is putting one foot in front of the other, leaving room for all sides of ourselves with their particular needs and abilities, and having a good dose of "it's all good". And it's OK if it is not so straightforward, does not go easily or smoothly, and you still have not arrived – it's quite often that way.

"Put one step in front of the other and the path will be under your feet." Antonia Speerforck

Finding the Way to Yourself in the Mountains

WHAT WE LEARN ABOUT RESILIENCE BY HIKING – THE ADVENTURE OF CROSSING THE ALPS

Date of publication: August 02, 2023

With illustrations

How the mountains can impart us lifelong learning

"Once in a life, trekking across the Alps and facing challenges and hardships along the way: With this personal experiment and through encounters with people who are exceptionally resourceful and full of joy in life, I wanted to discover how resilience and inner strength can happen, or could be learned. Along the way I discovered astonishing life stories and many new ideas about what makes us strong."

When Petra Bartoli y Eckert wants to get in touch with herself and clear her head, she sets off into nature – to be more exact, she walks through it. She is one of millions of Germans who are passionate about hiking and enjoying the peace and quiet of mountains or forests just as much as the rhythm of her steps on gravel-covered paths.

For her ultimate goal of crossing the Alps on foot, she wanted to prepare herself not only physically, but also mentally. That's why she visited mountain people and asked them about their advice for inner strength and endurance. What she learned along the way, however, has not only helped her with her hiking; she has become much more calm and composed in the face of life's highs and lows.

RECOGNIZING WOUNDS IN YOUR OWN FAMILY HISTORY AND FINDING YOUR WAY TO HEALING

Date of publication: October 25, 2023

Wounds you don't see and how to deal with them

This book focuses on family secrets and family taboos, and their systemic structures and psychological mechanisms. Susanne Panter, a professional origin counselor and mediator, examines blind spots, ruptures, and wounds in the family system in order to competently accompany those who are affected on the path towards clarifying their familial origins and thus finding themselves. Along with practical knowledge for a personal quest and many case stories, she also explains what prevents people from exposing a taboo and what 'risks and side effects' seekers can expect – because dealing with family history secrets can be an emotional roller coaster.

Encouraging people to actively confront family secrets, this book illustrates the process people undergo when they begin to address the wounds in the extended history of their family.

- Trending topic of transgenerational trauma and family secrets
- Many examples and concrete instructions, clarifying how wounds can heal when they are brought to light

The major new health guide by this bestselling author – how to live to a ripe old age and stay healthy for as long as possible

In his new book, bestselling author Blech gives us new answers to the question of what our bodies really need. He reveals that when we're ill, it's better to move around than stay in bed; that loss of muscle mass as we age isn't inevitable, merely the consequence of not enough exercise; that what we think of as a healthy diet can damage gut flora; and much more. Using the latest research, Blech exposes all kinds of health myths, shows us how to take charge of our medical wellbeing, and explains that our bodies and minds are sufficiently adaptable for us to stay healthy to a ripe old age. Master Plan Health is a practical instruction manual for the miraculous bodies in which we live, with lots of tips for how best to deal with the most common illnesses, and how to avoid them altogether.

Heart Clinic

WHY WOMEN'S HEARTS ARE DIFFERENT, AND HOW TO KEEP YOURS
HEALTHY

Date of publication: September 13, 2023

Rights sold to: China (Hunan Science)

The silent killer: heart disease is the leading cause of death in women

In this empathetic and highly accessible book, heart surgeon and gender medicine specialist Eifert – head of one of the largest women's heart clinics in Europe – and medic and science journalist Kirschner-Brouns reveal the latest findings concerning the female heart. What causes cardiovascular disease in women, and how can it be avoided? What do women's hearts need to recover, and to stay healthy?

Women's and men's hearts are not the same. There are certain crucial anatomical differences, which play a major role in cardiovascular disease. Although in the west two thirds of heart patients are male, female patients are twice as likely to die: among those in their fifties and older, cardiovascular disease is the number one cause of death.

Women's hearts react powerfully to strong emotions such as love and grief, to social pressure and cultural values – and their hearts' health or otherwise reflects their individual life stories.

LOSING WEIGHT AFTER THE AGE OF 60

THERE'S NO SUCH THING AS CAN'T – SLIMMING WITH THE 30-GRAM-FAT METHOD

Original title: Nie wieder dick! Abnehmen ab 60

Lose weight with the 30 grams of fat method: simple, comfortable, and sustainable

The principle behind the 30-gram-fat method is quite straightforward: instead of 125 grams of fat a day, the average for Germany, 30 grams of fat is allowed – yet without dispensing with eating pleasure. For example, a roll with butter and a slice of salami already contains about 32 grams of fat, more than should be consumed in one day. If you use low-fat cream cheese instead of butter and lean ham instead of salami, you end up with just 3 grams – without having to do without a hearty breakfast. The 30-gram-fat method is not a diet. It is a change of diet: effective, suited to everyday life, and easy to follow.

Even during the 'best age' beginning at 60, this method can be followed without much effort. Simple and comprehensible – with the 'Never again overweight' method, your best weight does not have to remain a fantasy!

- Losing weight reliably and permanently and maintaining the targeted weight, even at the (best) ages over 60
- The new book of the Spiegel bestselling author – more than 100,000 copies of the "Never again overweight!" series sold

The eye – our window to the world

The eyes are our most significant sensory organ, and eye disorders or failing eyesight in advancing age affect almost everyone at some time or another. Prof. Dr. med. Helmut Wilhelm uses many photographs, examples, and experiments to lucidly explain how the human eye functions, how images are processed in the brain, and what hazards there are for our visual organ, all according to the latest scientific findings. The book also covers nearly every eye disease and disorder and provides advice and encouragement in cases of visual impairment or the prospect of blindness. Here is a guide for becoming knowledgeable patients who are able to have a competent and self-determined influence on therapy options and possible surgery.

Explains the different kinds of eye disease in a way that's easy to understand for the general reader.

Early education, especially true for children up to the age of six, is a prerequisite for lifelong learning and the key to a successful life. So what is really best for children, for their education, to enable them to develop optimally? The expert for early childhood education and bestselling author Anke Elisabeth Ballmann takes up this hot topic in her new book with a pragmatic approach. Happy Birth Day

HYPNOBIRTHING FOR STRENGTH, SELF-TRUST, AND COMPOSURE

Date of publication: October 04, 2023

With birth stories that will assuage fears and give one courage

4-colour throughout, with photographs

Back to positivity: how stories of pain become stories of the heart once again

The most prevalent emotion regarding birth is fear: fear of pain, but above all fear of not being able to handle the pain, of being overwhelmed by it, of not being able to cope with it on one's own or of not being guided through this pain in a helpful, compassionate way. Pictures of risks, problems, and fears characterize everything concerning this – and regardless of how much education about the pain and anguish during childbirth, it is still quite unsettling and frightening for pregnant women. Everything we mentally register, consciously and unconsciously, has an effect on us, especially during the highly sensitive time of pregnancy.

The successful Kösel author Bianca Maria Heinkel has observed the need to alleviate pain as the major topic in her own courses and those of the instructors she has trained. Her second book thus focuses on fears and anxieties surrounding birth and birth pain. This is because fear paradoxically leads to the opposite of what is necessary for having a good birth experience: confidence, feeling safe, positive expectations, and ease of mind. The book shows specifically how hypnobirthing methods can be used to counter fears in the prenatal period and to reduce pain during birth. Through inspiring and empowering birth stories, this

OSKAR HOLZBERG

Love Needs Love

KEEPING LOVE ALIVE FOR THE LONG RUN

Date of publication: October 25, 2023

Rights sold to: Russia (Alpina)

“We can’t get it all right in love. But we can learn to do it less wrong.” Oskar Holzberg

The great love that keeps us perpetually floating on cloud nine and that even irritations can’t harm – we often cling to this vision, even though sooner or later we come to the realization that it doesn’t stand up to everyday life. Oskar Holzberg, a psychologist and couple therapist, proposes that we should ultimately release ourselves from the unfulfillable illusions of our romantic ideals of love. We should instead embark on the path of the ‘small love’, on which relationships can become more satisfying and enduring.

To do this, he creates a road map of love that covers four areas:

- Physical attraction and sexuality
- Bonding and intimacy
- Commitment and autonomy
- Communication and conflict skills

In these areas we can rebalance our love relationships and thus enable love to grow and become enduring. In doing so, it is crucial that we reveal our vulnerabilities to each other. Only when we take the risk of opening up to each other, speaking out, and sharing what we think, feel, and experience does love have a chance.

VADIM TSCHENZE

Remote Healing

HEAL YOURSELF AND OTHERS WITH THE MILLENNIA-OLD KNOWLEDGE OF THE SHAMANS

Date of publication: August 23, 2023

The first book on the subject of remote or distant healing with the cumulative shamanic knowledge of Vadim Tschenze

Who does not wish to allow healing to happen on its own and to be able to heal not only oneself but others as well? Vadim Tschenze introduces remote or distance healing clearly and accessibly. He begins by explaining how we can build effective protection against grief and illness by means of letting go of what's been lost and by the regenerative power of (self-) love. In the next step, we learn how to heal not only ourselves, but also our fellow human beings. For this, we focus on the energetic structure of the person to be healed and discover how this structure can be treated from afar. The author also provides a wealth of recipes, daily rituals, and tools along with the energetic and spiritual methods of shamanism, such as healing with the help of a phantom, the blue angel-radiance, and healing channels.

- Presented in an accessible way for individual practical use
- The new title by the successful author, with over 145,000 copies sold by Goldmann
- Approaches also applicable to other life issues, such as relationships and finances

UNDERSTANDING AND OVERCOMING FEMALE NARCISSISM

Date of publication: October 18, 2023

Your path to inner strength and vitality

Women afflicted by female narcissism are trapped in a state of tension between grandiosity and self-doubt, and it is difficult for them to find out who they actually are. How can they break out of this vicious circle and become the person they really are: authentic, positive, and unfeigned?

The expert for female narcissism Bärbel Wardetzki shows clearly how female narcissism comes about and provides impulses to understand oneself better, to create a more balanced power relationship between the diverse psychological elements, and to discover one's own autonomy. GENTLE WAYS TO HEAL TRAUMA

Date of publication: September 20, 2023

A key work for the processing of trauma and dissolving emotional blockages

“For me, the reason dogs are such wonderful teachers is that when they encounter a traumatized member of their species, they draw on the resources that have been evolutionarily designed to help them work through trauma. Many people don’t know that they also carry this untapped power in the very core of their being. Contacting this and getting it to function again is my path to healing.” Maïke Maja Nowak

In this book, bestselling author Maïke Maja Nowak opens up the inner world of people and dogs in a whole new way. In a compelling and absorbing way, she describes her personal path to trauma healing, which began thirty years ago, and how her deep connection to dogs is also grounded in this.

From her twenty years of seminar work, she recounts to us Carla, who has broken off every therapy so far; Carmen, who appeared to be trapped in a spiritual bubble; Helen, for whom every emotion immediately overflowed; and many other people who were seeking support in order to heal. She explains the inner world of humans in such a simple way that it is palpable how deeply she has penetrated it. Maja Nowak makes available here her special treasure of healing and exploration tools both for personal self-care and for people working in therapy.

Thanks, But Not Good

FOR A CONSIDERED COMPOSURE INSTEAD OF TOXIC POSITIVITY

Date of publication: September 27, 2023

For a considered composure instead of toxic positivity

The affectations of continual smilers are exhausting, and we seem to encounter them everywhere. Social media is overflowing with feel-good prophets and presentations of the supposedly perfect life. If you're not happy, it's your own fault – after all, you just need to change your mindset. But this not only disregards the reality of life for many people, it is also a dangerous attitude: it ignores the fact that people have little or no control over many aspects of their lives. Positivity that does not allow for possible vulnerability is not a healthy path towards finding oneself. "Just think positively!" is not the solution to all problems. This is what Franz Himpsl and Judith Werner maintain, and they have experienced hard blows of fate but also great happiness.

"Hello, Emergency" is thus the motto of their podcast, where they reflect on the existential issues of life. They consistently address the one question that had preoccupied Immanuel Kant: How does one remain hopeful in the face of all the crises in life, and this without shallow optimism or toxic positivity? The dissimilar author duo set out to find a source of hope that would convince even rational skeptics. And they have found it.

This book is for anyone who wants to face life with more reflective composure – and who are well aware of the fact that sometimes not everything is good – but that doesn't necessarily mean that everything is bad.

· Help in finding the best ways of dealing with life's crises
